

# Select Generics Program

Generic drugs contain the same active ingredients as their brand-name counterparts.  
**Generics simply cost less!**

**Your Group Medicare retirees have access to a program that helps reduce prescription costs and improve medication adherence.**

The Select Generics program is designed to help reduce retirees' costs for some generic medications used to treat and manage health conditions (such as diabetes, hypertension, cholesterol, etc.), and improve medication adherence. The Centers for Medicare & Medicaid Services tells us that the proper management of these conditions can significantly improve the quality of your retirees' health.

With this program, your retirees will have access to some of the most commonly prescribed and proven generic drugs – with no copay – at any network retail or mail-order pharmacy. All Select Generics have a proven track record for effectiveness and value.

The Select Generics program, along with our focus on clinical results, patient safety, drug effectiveness and net costs, helps deliver benefit value. Contact your sales representative to learn how this prescription drug program works to help mitigate health care cost trends.
